

PHILIPS

Monitors

Pop-up and Say Hello

Keep your work and family safe by using

Windows Hello™ with Philips Monitors secure webcam.

Windows Hello

The webcam is also equipped with advanced sensors for Windows Hello™ facial recognition which is a biometrics-based technology and allows quick, secured sign-ins. Designed to offer an alternative to passwords that is unique and more secure because it relies on technology that's harder to break.

Our range of Philips monitors below feature the Windows Hello™ pop-up webcam. This specific range includes USBC docking technology for connectivity for laptops and notebooks. For further or alternative connectivity for your business or home office use, this range also has HDMI and DisplayPort inputs so you are able to connect the camera via USB-A for Desktop PC use.
